

IV-Pole Intensive care

Material: stainless steel

I-I12214

- + effective infusion care by hanging safely IV-bottles and bags
- + mobile use: at the right time at the right place

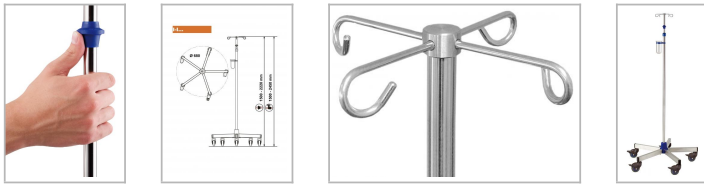

Product description

Material:	stainless steel
Colour of plastic parts:	blue
Bottle holder:	stainless steel to screw in 4 safety bottle hooks - 5 kg / hook
Adjustment:	single handed safety height adjustment
Regulating range:	1.500 - 2.350 mm
Tube diameter:	25 / 18 mm
Length of outer tube:	1.200 mm
Base diameter:	680 mm
Base leg profile:	45 x 25 mm
Castors:	mono castors Ø 80 mm, according to DIN EN 60601 electrically conductive and lockable
Base construction:	weighted
Total / base weight (net):	appr. 8,6 / 6,5 kg with drip vessel and holder

IV-Pole Intensive care

Material: stainless steel

Application

- + longer outer tube 1.200 mm enables the attachment of pumps in a customer-friendly height display

Technology

- + all plastic parts are light-resisting
- + integrated pull-out guard avoids separation of the adjustable tubes
- + safety bottle holder in accordance with DIN ISO 15375

Economy

- + complete recyclability

Safety

- + enough safe distance in between both tubes once the pole reached its lowest height
- + an integrated base-weights facilitates a safer attachment of various pumps and other medical equipment
- + no risk of injury from the rounded shape of the hook
